

Shock Block

Anti-Static Compound

Compuesto Antiestático

- Concentrated • High Foaming • Cleans
- Non-Staining • Labor Saving

Technical Data Sheet

PRODUCT DESCRIPTION:

A long lasting, easy to use formulation which combines non-residual quaternary compounds and polar solvents to reduce static electricity commonly found in low temperature and low humidity environments.

USES:

For hotels, motels, homes, waiting rooms and any other carpeted area where static charge is a problem.

ADVANTAGES:

Eliminates static shock immediately after spraying on the rug surface. Prevents uncomfortable human shock from walking and also static attraction of airborne dirt into the carpeting.

SPECIFICATIONS:

Active Ingredients: 15%
pH: 8
Color: Pale Tan
Solubility in Water: Complete
Odor: Slight Alcohol
Flash Point: None
Viscosity: Water Thin
Weight per Gallon: 8.29 Lbs.

PRODUCT/CONTAINER DISPOSAL:

Dispose of used/unwanted product according to state and local regulations. Offer container for recycling.

SIZES AVAILABLE:

1 Gallon Bottle, 5 Gallon Pail,
30 & 55 Gallon Drums.

Recyclable packaging

PRODUCT USE

Use Solution	1 gal. concentrate per 3 gal. of luke warm water makes 4 gallons end use product
--------------	--

DILUTION RATE

DIRECTIONS FOR PRODUCT USE:

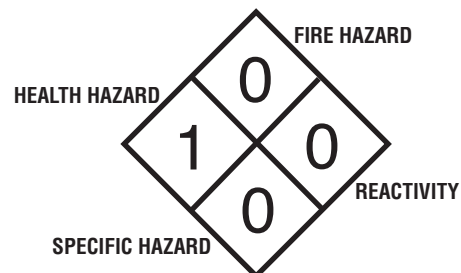

1. Pre-test carpet for colorfastness in an inconspicuous area at recommended use dilution. Use clean cloth or sponge for application and if test area indicates bleeding, color removal, carpet shrinkage or deterioration of adhesive, do not use.
2. Remove furniture and clean carpet thoroughly using normal industry-accepted cleaning techniques.
3. Per chart above, mix use solution of 1 gal. concentrate with 3 gallons of water.
4. Using a clean, corrosion-resistant sprayer, apply properly diluted solution evenly and uniformly to carpet. Diluted solution (1 gallon concentrate to 3 gallons water) should cover 600-800 sq. ft.
5. Brush area lightly with a hand pile brush.
6. Allow carpet to dry before using.

NOTE: For best results use an electric or pump-up sprayer having a nozzle of 8004. This means a spray angle of 80 and an 04 orifice. DO NOT mix concentrate with other products in the spray container. Use a dedicated sprayer.

It is recommended that protective gloves and safety glasses be worn when using this and all cleaning products.

Refer to SDS for further safety information.
